Higher SDD Worksheet 1 – Record Structures

Name	

1. Define a record structure for the following information.

Bank Account Num	Name	Balance	Address
19726	J Smith	12.13	10 Ayr Road
31441	L Roberts	872.12	25 Belmont Av.
87162	M Jamieson	12982.12	111 Ayr Place

2. Declare an array of records using the record structure above for 10,000 bank accounts.

3. Using visual basic, write a program that allows the bank details for the above 3 customers to be stored. The program should allow:
   - all details to be added at once
   - a customer number (1 to 3) to be entered and their details displayed on screen
